I. INTRODUCTION

I.1 The Need for a National Strategy against Trafficking in Human Beings

The development of the Strategy and Action Plan against Trafficking in Human Beings is an obligation that stems from the priorities set forth by the Republic of Kosovo in combating all forms of organized crime. Despite Kosovo’s progress after the year of 1999 in strengthening the rule of law, security and institutional reforms, trafficking in human beings is a specific form of organized crime that poses a great threat to society and to the state of the Republic of Kosovo.

Addressing and deterring trafficking in human beings requires a special attention and approach due to its complex nature. Therefore, throughout this National Strategy and Action Plan are presented the severity of human trafficking phenomenon that our country is facing and the special attention that the Kosovo Government and other stakeholders focus on in combating human trafficking.

The strategy was drawn upon a wide consensus of all stakeholders on the strategic goals and priority policy measures to be taken. Their findings were preceded by a comprehensive assessment of the goals, objectives and activities set forth in the 2008-2011 National Action Plan.

This document clearly defines the strategic goals and specific objectives, which are based on public measures and activities to be supported institutionally and financially, and which are verifiable through a detailed monitoring and assessment process².

In addition, the Government of Kosovo is fully committed to protect its citizens. Therefore, the legislative reforms on preventing and combating trafficking in human beings are in the process of their final approval.

All these initiatives show that the Government of the Republic of Kosovo is and will continue its efforts to combating trafficking in human beings with all its full institutional capacities.

The experiences gained and lessons learned from all responsible institutions during the implementation of the 2008-2011 National Action Plan served as the foundation for drafting this Strategy and Action Plan. Despite the progress made in drafting legislation in preventing and combating trafficking in human beings, the analysis made shows that Kosovo is and will continue its efforts in combating trafficking in persons in its full institutional capacities. Kosovo Government has proven its commitment in fighting trafficking in persons by being ranked for two consecutive years in Tier 2³.

I.2 Principles of the National Strategy and Action Plan Against Trafficking in Human Beings.

---

² See chapter IV of this document “Strategy Implementation, Monitoring and Assessment”.
³ http://www.state.gov/g/tip/rls/tiprpt/2010/142760.htm
**Principle 1. Governmental Ownership of the Strategy**

- **Responsibility of the Government of Kosovo**

Compiled in response to trafficking in human beings, this Strategy is nationally owned, where the responsibility for the implementation of its strategic goals, objectives and activities are vested in the Government of Kosovo and its institutions. The Government ownership of this strategy has been manifested throughout its drafting process. The National Strategy and Action Plan against Trafficking in Human Beings is a result of coordinated efforts of the government, civil society and international partners. Its implementation and monitoring will, however, require the same cooperation.

- **Financial Internal Resources**

Financial requirements regarding the implementation of this strategy will be mainly covered by Kosovo’s budget linked to and in line with the Mid-Term Budget Plan, with sectoral strategies, such as the ones on education, social services, health, and employment.

- **The strategy as a Product of Cooperation with International Partners**

Our international partners widely supported our country to overcome many difficult political situations as well as to carry out its reforms and develop policies. The Government of Kosovo is aware that the implementation of this strategy will require first and foremost the mobilization of its own human and financial resources, second the support of international partners and the last but not the least of specialized international organizations. Therefore, the Government of Kosovo is committed to effectively employ this support.

The Kosovo Government’s ownership of the 2011-2014 Strategy has been also emphasized in the objectives and the activities set forth in this National Action Plan, which reinforces the implementation to rely mainly on the institutions of Kosovo.

**Principle 2. Participation**

Combating human trafficking in human beings should not be seen only as the responsibility of the Ministry of Internal Affairs and its structures. In light of this, the drafting of the strategy was based on an inclusive participatory system that included central institutions, civil society, local and international Non-Governmental Organizations working in Kosovo, and international partners. The drafting process of the strategy was characterized by a wide participation of stakeholders, which will ensure its success.

The institutional structure for the development of the strategy consists of: i) National Anti-Trafficking Coordinator, Secretariat, Working Groups (prevention, protection, prosecution and conviction and, the children’s group).
National Anti-Trafficking Coordinator coordinates and organizes the work for the development and implementation of this Strategy\(^4\).

Secretariat against Trafficking in Human Beings, Anti-trafficking Secretariat, which among others, is responsible for monitoring and evaluation of the strategy, provides support to NATC to coordinate all activities combating trafficking, including organization of the work in developing the 2011-2014 under the auspices of the National Anti-Trafficking in Human Beings Coordinator.

Working Groups\(^5\) are responsible to elaborate sector problems of the Strategy and to provide relevant information. Working Groups are selected in such a way that they represent widely the public institutions and the civil society.

The Role of International Partners: International partners supported constantly the Assessment and Analysis process of NAP 2008-2011, and the development of this Strategy. They conveyed their valuable input during the drafting of this strategy and action plan.

This document takes into consideration the recommendations of the EC reflected in the 2009 and 2010 Progress Report on Kosovo.

The Role of Local Partners and NGOs consisted not only in their active participation during the drafting process of the strategy, but also in their role as carriers of actions and partners of state organizations in drafting policies, conducting research works related to trafficking in human beings, as well as in providing services to victims.

IOs and inter-governmental organizations working in Kosovo support the development of national coordinating structures by providing to the main stakeholders technical experience, training when needed, and financial support for the implementation of NAP.

- IOs promote human rights approach as well as support the implementation of activities against trafficking, leaving the local stakeholders to lead the process,
- IOs participate in the Inter-Ministerial Working Group (MWG) as “observers” in order to advise NATC and the member of the MWG.
- IOs provide their support to NGO networks and actively participate in the coordinating structure and,
- IOs provide support to government structures and social partners in order to secure sustainability of anti-trafficking initiatives.

**Principle 3. Human Rights-Based Approach**
This strategy employs human rights-based approach, namely it promotes and protects human rights. Specifically, it protects the rights of trafficking victims when they are women and children.

\(^4\) According to Government’s Decision no 029 of the date 10/04/.2008

\(^5\) Established through a decision of the Minister of Internal Affairs of the date 23/03/2011
While compiling this strategy, the drafters took in consideration the human rights principles such as:

- The right to liberty and security of person,
- The right to freedom from slavery,
- The right to freedom from inhumane or degrading treatment or punishment,
- The right to freedom of movement and residence,
- The right to a fair trial and effective judicial means, freedom from practices similar to slavery, prohibition of force labour, freedom of expression and the right to access information and protection of personal data.
- The right to freedom from torture, and the right to life, the right to health and the right to education⁶

This is the reason why the approach towards victims is focused on the protection of their rights in the sense of obtaining necessary information, provision of physical and legal protection, material assistance and compensation to enable their long-term integration.

A specific approach employed in this document is the protection of children’s right. Children specific situation was taken into account in all actions envisaged in the Action Plan. Child trafficking prevention and their particular protection from being victimized was considered one of the main challenges of this Strategy

**Principle 4. Interdisciplinary and Cross-Sectoral Approach**

The Strategy and Action Plan against Trafficking in Human Beings is a sector-based strategy based on the priorities of the Government in combating the organized crime, and increasing the level of security in the country. At the same time, this document aims to coordinate the actions and activities with other sectors of public services, such as: education, health, employment services, social services, as well as with other independent sectors, such as: police, prosecution and courts. Interactions and coordination of anti-trafficking activities across sectors is based on the fact that this strategy aims of creating an efficient information system, which will be enriched by each sector on its own, and thus providing help to identify perpetrators as well as to identify and protect victims of trafficking.

**Principle 5. Sustainability**

The concept of this Strategy is conceptualized as a platform of strategic goals, objectives fostering an active participation of all stakeholders in its implementation. The Government, as the key responsible authority, as well as the other stakeholders, will constantly monitor the implementation of the strategy. Attentively, the Government shall adapt the objectives and activities foreseen in the Action Plan to the actual situation and based on the monitoring results.

---

⁶ UN Declaration of Human Rights.
During the drafting process of the Strategy, the Government paid special attention to set clear goals and objectives, which are well-defined and feasible, relying mainly on the existing financial and human resources’ capabilities of Kosovo.

I.3 Enabling and Challenging Factors regarding the Implementation of this Strategy.

Some of the factors that enable the implementation of the strategy are:
- Positive steps taken towards institutional reforms and political environment stability,
- Wide and continuous participation of stakeholders in strategy development, implementation and monitoring,
- The support provided by international partners

Some of the factors that could threaten the implementation of the strategy are:
- Threats related to the country’s security.
- Lack of cooperation and inadequate coordination of those responsible for the implementation of this strategy.

II. SITUATION ANALYSIS AND ASSESSMENT OF EXISTING MECHANISMS

II.1 Socioeconomic Situation of the Country

Kosovo with an area of 10.887 km² and a population of 2.4 million residents is situated in the central part of Balkans Peninsula.

Changes that took place in the region of Balkans after 1990s, as a consequence of tensions and armed conflict in ex-Yugoslavia, brought about great changes not only in the political map of the region, but also in the socioeconomic situation of the former Yugoslavian countries. Kosovo, with its central location in the Balkans Peninsula, with its human resources available, and with its many communication links with surrounding countries, enables a socioeconomic development by preserving its multi-ethnic structure, and aims at Euro-Atlantic integration.

Kosovo has a predominantly young population, where 50% is under the age of 24 and only 8% of its population is above 64. Compared to other countries in the region, Kosovo has the highest unemployment rate. In 2008, it is estimated that 48% of the labour force was unemployed. Unemployment tends to be of a long-term nature, where about 82% of those unemployed are without a job for more than 12 months. The unemployment rate among the young people is 73%. Unemployment based on gender is present, too. Unemployment rate among women is 55%, while 39% among men. The number of students that are forced to leave their schools continues to be worrying, especially among girls. During the period of 2005-

---

7 SOK, Survey of Labor Force
2008, there was a rapid growth of the GDP with an average growth of over 4%, which in 2008\textsuperscript{8} achieved to 5.4%.

Macroeconomic and traditional social indicators in Kosovo are not encouraging, with a limited growth of GDP, failing to reduce the high level of unemployment of 48% and that of poverty which remains at 45%.

These low socioeconomic indicators illustrate country’s developmental contradictions, which have generated not only social and economic problems, but also problems linked to organized crime. Currently, Kosovo is considered as a country of origin, destination and maybe transit of trafficking in human beings.

\textbf{II.2 Vulnerable Groups to Trafficking}

Trafficking in human beings is part of organized crime. This crime involves perpetrators playing a variety of roles and conducting different illegal acts within or outside the territory of a country. Victims of trafficking usually move illegally across borders, but may also be trafficked within a country’s borders itself. The crime of human trafficking is divided into different categories depending on the purpose of exploitation. Based on the types of trafficking, it is concluded that vulnerable groups to trafficking in human beings are children and adults alike\textsuperscript{9}. Victims such as children and adults, are forced to emigrate as a result of high level of poverty in their country of origin and enticed by promises for a better life and legal employment. Most of the identified victims in Kosovo are women and minor girls trafficked within the country. The main form of exploitation remains that for sexual acts / forced prostitution\textsuperscript{10}.

\textbf{II.3 Existing Institutional Mechanisms}

There are several institutions responsible for the development and implementation of state level policies in combating trafficking in human beings.

\textbf{Ministry of Internal Affairs}, which through the Anti-Trafficking National Coordinator, Secretariat and Trafficking in Human Beings Directorate of Investigations (THBID), works on prevention aspect of this crime, anti-trafficking investigative activities and measures, protection of the trafficked victims, and arrest of perpetrators as well as presentation of facts based on the collection of evidence and enforcement of other investigative tools and strategies to prosecution.

\textbf{National Anti-Trafficking Coordinator} is a new structure established based on Prime Minister Office’s endorsement, Decision No. 029 as of 10\textsuperscript{th} of April, 2008 The NATC’s mandate is to coordinate, monitor and report on the implementation of policies against trafficking in human beings, as well as to chair the inter-ministerial working group. In addition, the National Coordinator performs the duty of the National Reporter against Trafficking in Human Beings.

\textsuperscript{8} The statistics are taken from the Kosovo Human Development Report 2010, Table 2.2, p.38.

\textsuperscript{9} Presentation of USG/TIP Tier Placement-ICITAP-US Embassy, 13 July 2008.

\textsuperscript{10} Six-monthly working report of the THBIS DAOC and the regions, for the 6-month period January – June 2008.
Anti-Trafficking in Persons Secretariat (ATIPS) provides administrative and logistic support to the NATC. The secretariat is the driving force for the implementation of the national response against trafficking.

Chaired by the NATC, the Anti-TIP Secretariat:

- Ensures regular communication between MWG and TWG and communication/sharing of opinions between stakeholders (e.g. through bulletins and/or website).
- Ensures distribution of all relevant information to the local, regional and country level.
- Manages a database of projects/contacts, as well a list of NGO that are active, and makes it available to the stakeholders.
- Keeps regular contacts with donors inside the country, and calls regular donor meetings in order to coordinate the funds and avoid duplication of projects.
- Monitors all activities implemented by all stakeholders.
- Drafts quarterly monitoring reports of the Anti-Trafficking Working Groups.

The Inter-Ministerial Working Group is a group of central institution representatives, whose mandate is to coordinate policy implementation, monitor and report every quarter on the progress to the NATC’s Office, respectively to the Anti-Trafficking Secretariat. Two members from each ministry and responsible institutions participate in the Inter-Ministerial Working Group, while local NGOs and international partners are represented with only one member.

Kosovo Judicial Council and Prosecutorial Council are those institutions responsible for criminal prosecution of traffickers, their appropriate conviction, for ensuring non-discriminating treatment for victims of trafficking before and during trials, for confiscation of property and assets gained through the criminal act of trafficking. They guarantee the application of legally binding compensation for victims of trafficking. These institutions are responsible to provide security before, during and after criminal procedures as well as to undertake all necessary and possible measure to protect victims from fear, threat and punishment of those suspicious or their collaborators, including punishment from persons in power. If necessary, a similar protection shall be given to family and friends of the victim.

Ministry of Justice, through its Division for Advocacy and Assistance to Victims (DAAV), provides legal assistance, protection and shelter for the victims of trafficking.

Ministry of Labour and Social Welfare, through its professional institutions, such as the Department of Social Welfare, Department of Labour and Employment, Department/Institute for Social Policy and Social Welfare Centres, implements policies and provides services for the protection and long-term integration of victims of trafficking.

Ministry of Education, Science and Technology plays a significant role in preventing trafficking through education, curricula, cross-cutting curricular approach, and different extra-curricular activities.

Ministry of Culture, Youth and Sports, through its Human Trafficking Prevention Program, provides to NGOs and non-formal groups trainings and activities that raise the awareness of preventing trafficking. Other central institutions, such as MLGA, MoH, MEF, are included through programs that address trafficking in human beings directly and indirectly.
Ministry of Health plays an important role in protecting the victims, respectively providing health and rehabilitation services to victims of trafficking. In addition, the Ministry provides training and information sessions to raise the awareness of its medical staff for treating victims of trafficking.

Human Rights Unit implements policies that promote and respect human rights in central and local level. Within the institutional framework, international partners and local non-governmental organizations played an important role against trafficking in human beings.

### Organizational Structure of Coordinating, Monitoring and Implementing Mechanisms against Trafficking in Human Beings in Kosovo

#### Advisory Body:
- Local NGOs
- Representatives of International NGOs

#### National Coordinator

#### Anti-Trafficking in Persons Secretariat

#### Inter-Ministerial Working Group
- Ministry of Internal Affairs
- Kosovo Police
- Kosova Judicial Council
- Kosova Prosecutorial Council
- Ministry of Education, Science and Technology
- Ministry of Justice
- Ministry of Culture, Youth and Sports
- Ministry of Labor and Social Welfare
- Ministry of Health
- Ministry of Local Government Administration

#### Strategic Level

#### Operational Level

**Prevention:**
- OPM- AGE-OGG
- Ministry of Education
- Ministry of Culture
- Ministry of Local Government
- MIA – Kosovo Police
- Local and international NGOs

**Protection:**
- Ministry of Labor and Social Welfare
- Ministry of Health
- Ministry of Justice
- All stakeholders involved in the implementation
- MIA – Kosovo Police
- Local NGOs
- International organizations

**Prosecution and Punishment**
- MIA – Kosovo Police
- KJC
- KPC
- All stakeholders involved in the implementation

**Children Protection**
- All stakeholders involved in the implementation
- MLSW
- MIA – Kosovo Police
- KJC
- KPC
II.4 Existing Legal Mechanisms

According to the legislation into force, trafficking in persons means the recruitment, transportation, transfer, harbouring or receipt of persons, by means of the threat or use of force or other forms of coercion, of abduction, of fraud, of deception, of the abuse of power or of a position of vulnerability or of the giving or receiving of payments or benefits to achieve the consent of a person having control over another person, for the purpose of exploitation. The legal basis of domestic legislation relies on a wide range of international conventions and policies.

4.1 International Legal Documents

A wide range of international conventions and documents constitute the legal basis for the development of an adequate legislation against trafficking in human beings and protection of human rights in Kosovo.

1. The Universal Declaration of Human Rights – ratified by the Assembly of Kosovo.
10. International Covenant on civil and political rights and its protocols.
11. International Covenant on economic, social and cultural rights
12. Convention against Torture and other Cruel, Inhuman or Degrading Treatment or Punishment.
17. Convention against Child Abduction 2004/29, commented on 29/07

---

11 Provisional Criminal Code of Kosovo, Article 139
12 The list is taken from the preparatory work made in March 2008, Lessons Learned from the Plan 2005-2007.
13 International conventions have not been specifically ratified by the Assembly of Kosovo, but they enter into force based on the Constitution of the Republic of Kosovo, Article 22, Page 6.

4.2 Legal Documents Regulating Different Aspects of Trafficking in Human Beings

1. Constitution of the Republic of Kosovo, approved by the Assembly of Kosovo on 15 June 2008
2. Criminal Code of Kosovo, 03/L-002, date 22/12/2008
3. Criminal Procedure Code of Kosovo 03/L-003, date 22/12/2008
4. Law on Police of Kosovo (reconsidered), 03/L-035, 04/06/2008
5. Law on Labour No. 03/L-212, of the date 02/11/2010
6. Law on the Labour Inspectorate 03/L-017, 10/09/2008
7. Law on the Sanitary Inspectorate of Kosovo, No.2003/22; date 06/11/2003
10. Law on Management of the Sequestrated or Confiscated Assets, 03/L-141, 10/08/2009
11. Law on Integrated Management and Control of the State Border, 2008/03-L065, date 21/05/2008
12. Law on Protection Against Domestic Violence, 2010/03-L-182, date 01/07/2010
13. Juvenile Justice Code, 2010/03-L193, of the date 08/07/2010
14. Law on Social and Family Services (reconsidered), 02/L-17, date 01/05/2007
15. Law on Gender Equality in Kosovo, 2004/2, date 19/02/2004
17. Law on Prevention and Fight of the Cyber Crime, 2010/03-L-166, date 10/06/2010
18. Law on Police Inspectorate of Kosovo, 2008/03-L-036, date 20/02/2008
19. Law on the Protection of Personal Data, 2010/03-L172, date 29/04/2010
20. Law on Termination of Pregnancy, 2008/03-L-110, date 06/11/2008
22. Law on Foreigners, 2008/03-L-126, date 16/12/2008
23. Law on Asylum, 2008/03-L-066, date 21/05/2008
25. Law on Inheritance, 2004/26, date 28/07/2004
26. Law on Narcotic Medicaments, Psycho-Tropes and Precursor, 02/L-128, 15/08/2008
27. Law on Vocational Ability, Rehabilitation and Employment of People with Disabilities, 2008/03-L-019, date 18/12/2008
28. Law on Material Support for Families of Children with Permanent Disability, 2008/03-L-022, date 16/05/2008
30. Law on Primary and Secondary Education
31. Law on Prevention of Money Laundering and similar criminal acts
32. Law on Medical Emergency Services, no 02/L-50, dated 23/02/2006.
33. Law on Public Peace and Order, 03/L-142, date 29/10/2009
34. Law for Prevention and Fighting against Infectious Diseases, 02/L-109, 15/10/2008

This legislative framework is challenged by its ineffective implementation, partly because of judges and prosecutors’ lack of understanding of laws, and partly because of the lack of knowledge about documents
that can be used during investigation and prosecution of these offences. Difficulties are of several aspects; firstly, to differentiate between the Law against Trafficking in Human Beings and other laws; secondly, quite frequent application of minimum sentences to offenders, and; thirdly, the lack of legislation and mechanisms for the protection of witnesses and victims.

II.5 Existing Operational Mechanisms

5.1 Standard Operational Procedures (SOP)

Standard Operational Procedures (SOP) for foreign victims and local ones, as well as the Minimum Standard of Care for Victims of Trafficking were adopted and are being implemented by all stakeholders in full coordination. Based on these SOPs, the stakeholders involved in combating trafficking in human beings have an agreement, which defines respective roles and responsibilities for a better cooperation and coordination of actions.

With the support of the international partners, a system of National Referral Mechanisms (NRM) to improve the protection and the referral system for victims of trafficking was set up.

Setting up the NRM and TRM through a cooperation framework, participating states in cooperation and in strategic partnership with civil society and other stakeholders working in this field fulfil their obligations to protect and support the human rights of the victims of trafficking.\(^\text{14}\)

5.2 Minimum Standard of Care for Victims of Trafficking

Minimum Standards of Care for Victims of Trafficking is a support mechanism in combating trafficking in human beings. The document defines the minimum standards of care for victims of trafficking since early stages of identification. It is based on respecting basic principles, human rights, on trust created between the victim and service providers, the full respect and will of the victims of trafficking by service providers, non-discriminatory approach based on racial, religious, age, psycho-physical state by the service provider.

\(^\text{14}\) ODIHR Handbook on Guidelines and Principles developed and implemented by NRM could serve as an important source for advice and information on the role that NRMs have in providing assistance and protection to victims. In this aspect, ICMPD plays an important contribution to support government institutions to fairly implement NRM and TRM.
III. STRATEGIC FRAMEWORK - VISION, MISSION AND STRATEGIC GOALS

1 Vision
The vision of this strategy is “coordination of the fight against trafficking in human beings in order to build a society that lives in peace away from the threat of the crime of trafficking in person and any other organized crime, thus creating an image of Kosovo as a peaceful country with high security standards.”

2 Mission
The mission of this document is to determine strategic priorities in combating trafficking in human beings, to define specific objectives for the institutions that undertake responsibilities in the fight against trafficking, as well as to align inter-institutional actions to achieve the objectives set forth herein. The mission of this strategy is also to enhance the quality of services by reducing damages that trafficking causes to society, and to intensify investigation, prosecution and conviction of offenders.

3 Strategic Goals
Strategic goals are formulated to provide an appropriate response to the issues of trafficking in human beings that need to be addressed in the future through new legal and institutional methods.

This strategy addresses four major areas:

3.1. Prevention of trafficking in persons
3.2. Protection and support of victims and witnesses
3.3. Investigation and prosecution of trafficking crimes
3.4. Protection of children

3.1. Prevention of Trafficking in Persons
Strategic Goal 1- Increase public awareness about trafficking in human beings

- Specific Objective 1- Raise awareness of vulnerable groups and stakeholders (children, young people, women and men) on trafficking.
- Specific Objective 2 – Increase public awareness about legal sanctions related to engaging in trafficking.

Strategic Goal 2 – Improve efficiency in prevention of trafficking in all levels of education

- Specific Objective 1- Enrich education curriculum with appropriate information on prevention of trafficking.
- Specific Objective 2 – Increase the inclusion of vulnerable groups in informal education.
- Specific Objective 3- Address effectively school dropout problem.

Strategic Goal 3- Increase human resource capacities in the prevention of trafficking and inter-institutional cooperation

- Specific Objective 1- Develop and advance capacities of state institutions in the prevention of trafficking.
Specific Objective 2 – Increase the capacities of educational institutions in the prevention of trafficking.
Specific Objective 3 - Increase the capacities of NGOs and non-formal groups in the prevention of trafficking.
Specific Objective 4 - Strengthen inter-institutional and community cooperation in the prevention of trafficking.

3.2. Protection and Support of Victims and Witnesses

Strategic Goal 1 - Improve identification and referral of victims of trafficking in human beings

Specific Objective 1 – Advance existing identification and referral procedures for victims of trafficking
Specific Objective 2 – Increase institutional capacities for identification of victims of trafficking

Strategic Goal 2 – Successful coordination and cooperation and quality services for victims of trafficking

Specific Objective 1 – Enhance the overall legal framework
Specific Objective 2 – Strengthen the referral mechanism, increase institutional capacities and ensure sustainable services to victims of trafficking
Specific Objective 3 – Ensure sustainable and long-term services to victims of trafficking

Strategic Goal 3 – Sustainable reintegration of victims of trafficking

Specific Objective 1- Improve long-term reintegration services for victims of trafficking
Specific Objective 2 – Coordination and alignment of repatriation services for foreign victims of trafficking
Specific Objective 3 – Coordination and alignment of services for relocation to third countries for victims of trafficking included in the protected witnesses program

3.3. Investigation and Prosecution of Trafficking Crimes

Strategic Goal 1 – Improve investigation methods in order to increase the efficiency to combat trafficking in human beings

Specific Objective 1- Review and amend the legal framework pertaining to trafficking in persons.
Specific Objective 2 – Increase institutional capacities (police, prosecution and courts) to use such investigation methods.
Specific Objective 3 – Coordination and cooperation among the Police, Prosecution, Courts, Customs, Tax Administration, respective Inspectorates.
Strategic Goal 2 – Strengthen and develop cooperation with other states and international organizations to combat trafficking in human beings

- **Specific Objective 1** - Cooperate with other states and international organizations, Interpol/Europol/Eurojust/Seci/Frontex, for joint investigations.

Strategic Goal 3 - Increase the efficiency and effectiveness of Police, Prosecution and Courts to investigate and convict trafficking perpetrators

- **Specific Objective 1** – Increase the capacities of Police, Prosecution and Courts
- **Specific Objective 2** – Improve sanction policies for traffickers and offenders.

Strategic Goal 4 – Confiscation of property as of commission of crime of human trafficking and victims’ compensation

- **Specific Objective 1** – Implement the procedures for confiscation of traffickers’ property.
- **Specific Objective 2** – Implement standard procedures for victims of trafficking in accordance to local laws and international standards.

Strategic Goal 5 – Ensure proper and non-discriminatory treatment of victims of trafficking

- **Specific Objective 1** – Implement standard procedures for victims of trafficking in accordance to local laws and international standards.

Strategic Goal 6 – Achieve quality professional development through trainings

- **Specific Objective 1** – Training of the Police, Prosecutors and Judges.

3.4. Protection of Children

For the purpose of this strategy, certain terms are used defined as following:
National Strategy and Action Plan against Trafficking in Human Beings 2011-2014 for the chapter on Children shall be based on the main international instruments related to protection and treatment of children who are victims of trafficking. An analysis of those conventions, standards in the area of protection of children who are victims of trafficking or are vulnerable to trafficking is presented below. They are followed by local legal provisions.

3.5. Basic Principles of International Law upon which this strategy is based

The basic principles implemented in all phases of care and protection of children trafficked in the country of origin, transit or destination, or in case of in-country trafficking, are the following according to article 3 of Palermo Protocol:

- **Respect of the Rights of the Child**: For all children, both for those who are residents of a respective country, and for those who are residents in another country, or non-resident children, the CRC will be employed. Those rights will be free from any discrimination.
- **Best Interest of the Child**: In all actions concerning child victims, whether undertaken by public or private social welfare institutions, courts of law, administrative authorities or legislative bodies, the best interest of the child shall be the primary consideration.

---

15 International mechanisms related to protection and treatment of children are cited in section II.4. “Existing legal mechanisms”
16 Palermo protocol, article 3.
• Non-Discrimination: Child victims of trafficking are entitled to the same protection and rights, be they children who are not residents of the country in which they find themselves. They must be considered as children first and foremost. All considerations of their status, nationality, race, sex, language, religion, ethnic or social origin, birth or other status, including the status of immigrants, must be secondary.

• Respect for the Views of the Child: A child victim who is capable of forming his or her views enjoys the right to express those views freely in all matters affecting him or her. The respect of the child’s view shall be guaranteed through any legal process, protection and mediation care as well as identification and implementation of a long-term solution, especially in decisions related to a possible return of the child in his/her family or his/her country of origin. The views of the child shall be given due weight in accordance with his or her age, maturity and best interest. A child shall be given the possibility to be listened in all court or administrative proceedings related to him/her, either directly or through his legal representative or another competent body in compliance with the internal rules.

• Right to Information: Child victims must be provided with accessible information about their situation, their entitlements, including protection mechanisms, other services available and the family reunification and repatriation process. Information shall be provided in a language, which the child victim is able to understand. Suitable interpreters and psychiatrist shall be provided whenever child victims are interviewed.

Prevention
Strategic Goal 1 – Improving the early identification and referral system of vulnerable children and potential victims of trafficking, as well as raising the awareness of the society related to child trafficking

• Specific Objective 1 – Revision and implementation of current legislation and policies on identification of child victims of trafficking
• Specific Objective 2 – Increasing the capacities of institutions responsible (government and non-government) for the early identification of vulnerable children to trafficking and victims of trafficking
• Specific Objective 3 – Empowering and coordinating among institutions (government and non-government) in case referral process
• Specific Objective 4 – Raising the awareness of all categories of the society for the danger of child trafficking

Protection
Strategic Goal 2 – Improving the protection system of vulnerable children and victims of trafficking in a coordinated manner among institutions responsible having in mind the best interest of the child

• Specific Objective 1 – Aligning the local legal framework with the international legislation and adoption of new international policies related to the protection of vulnerable children to trafficking and child victims of trafficking.
• Specific Objective 2 – Improving and implementation of different forms to protect vulnerable children to trafficking and child victims of trafficking through child’s own participation
• **Specific Objective 3** – Better coordination of activities among institutions responsible (government and non-government) for the management of cases related to vulnerable children to trafficking and child victims of trafficking through child’s own participation

• **Specific Objective 4** – Implementing and improving of long-term reintegration programs by institutions responsible for vulnerable children to trafficking through child’s own participation.

• **Specific Objective 5** – Advanced coordination for repatriation services for child victims of trafficking

**Prosecution and Conviction**

**Strategic Goal 3** – Improve proactive and reactive investigation techniques in order to increase the efficiency in combating child trafficking within the framework of organized crime

• **Specific Objective 1** – Improving and advancing the legal framework and aligning it with the EU directives

• **Specific Objective 2** – Coordinate services for relocation of child victims of trafficking to third countries

**Strategic Goal 4** – Increase the efficiency of Police, Prosecution and Courts to investigate and convict perpetrators of trafficking

• **Specific Objective 1** – Increase the capacities of Police, Prosecution and Courts dealing with issues of trafficking in human beings
IV. STRATEGY IMPLEMENTATION, MONITORING AND ASSESSMENT

IV.1 The Purpose of the Monitoring System

The process of implementation will be oriented toward accomplishing the strategic goals, objectives and anti-TIP activities set forth in this document. Monitoring and assessment of the accomplishment of objectives and of the effectiveness of activities is an integral part of the strategy and one of its main components in the implementation process. Monitoring and assessment will serve to track strategy implementation, to measure in the process the level of objectives achieved, and to assess the need for new policies and/or strategies, especially those related to activities. The monitoring process shall be implemented by institutions responsible for the implementation of the strategy with a wide participation of relevant stakeholders.

Final monitoring and assessment of the Strategy and NAP is an integral part of the duties and responsibilities of the Anti-Trafficking in Persons Secretariat. However, the assessment process will be done along with the increase and strengthening of institutional capacities of every institutional structure part of the implementation of this Strategy.

The assessment and monitoring are highly necessary due to the current fragile institutional capacities namely:

i) Deficiency of administrative information, in some cases their inaccuracy, which is due to the relatively low level of development of a unified information and statistical system in Kosovo;

ii) Lack of monitoring mechanisms responsible for monitoring and assessment within institutions themselves;

iii) Deficiency of serious assessment/studies about trafficking using standardized methodologies.

The main dimension for the implementation and assessment of the strategy include:

a. Institutional capacities,
b. Monitoring indicators during and by the end of a three-year period,
c. Information sources and measuring instruments,
d. Dissemination and use of monitoring and assessment results.

IV.2. Institutional Capacities for Monitoring and Assessment

The monitoring and assessment system shall cover all responsible institutions for the implementation of the objectives set forth in the Strategy and Action Plan.
- **Ministry of Internal Affairs**, one of the main responsible institutions for the implementation of the objectives, has already established the Anti-Trafficking in Persons Secretariat, which carries out also monitoring and assessment of the strategy under the purview of the National Anti-Trafficking Coordinator. This Unit shall monitor the most significant indicators related to combating trafficking in human beings. At the end of each year, the Office of the National Anti-Trafficking Coordinator should prepare a progress report about the level of accomplishment of the objectives of the strategy, which is to be published and made available to all government and non-government stakeholders.

- **Participating ministries in the Working Group** (MoJ, MLSW, MEST, MoH), and their subordinate institutions, including KJC and KPC, shall be responsible for monitoring and assessment of activities for which they are held responsible. These institutions shall report periodically to the NATC/Anti-Trafficking Secretariat for further consolidation. In addition, all public institutions involved as partners or implementers of the NAP will be included in the process of monitoring and evaluation.

- Non-Governmental Organizations will participate in the monitoring and assessment process of the strategy being part of the round tables organized by the National Anti-Trafficking Coordinator. In these round tables, the civil society will present their observations related to the anti-trafficking projects and programs they have implemented.

### IV.3. Monitoring and Assessment Indicators

**Final Indicators** *(performance indicators of the strategic goals)*

1. Number of relevant laws and regulations that have entered into force following the adoption of Strategy,
2. Established structures (NATC, Inter-Ministerial Working group, Coordinators),
3. Number of signed bilateral and multilateral agreements in the state level,
4. Strategy monitoring and assessment reports,
5. The percentage of population that is aware about trafficking in human beings,
6. Curriculum areas and textbooks, according to grades, that address the issue of trafficking in human beings,
7. Number of projects and programs on the protection of children’s rights,
8. Number of identified victims of trafficking (how many of them are children),
9. Number of prevented cases of trafficking (how many of them are children),
10. The percentage of victims trafficked more than once,
11. Number of victims of trafficking who were provided adequate services (shelter, employment, education, legal protection, compensation, etc.),
12. Number of convicted perpetrators on human trafficking charges,
13. Number of cases and years of imprisonment of convicted persons,
14. Number of TIP investigations, prosecutions/indictments and trials/convictions,
15. Number/percentage of victims that have received free of charge legal services, and the number of victims not prosecuted due to being categorized as victims.

**Intermediate Indicators**

Refer to the indicators for monitoring activities in Anti-trafficking Action Plan.

**IV.4 Monitoring and Assessment Instruments**

1. Standardized system of data collection and processing,
2. Administrative/statistical data of MIA (Kosovo Police), MoJ, MLSW, MoH, ME, KPC, KJC,
3. National/international referral mechanisms,
4. Surveys regarding the Kosovo citizen’s level of knowledge as a result of the conducted anti-TIP awareness campaigns.

**IV.5 Dissemination and Use of Monitoring Results**

Monitoring and assessment results shall be distributed to in order to acknowledge the progress in the fight against trafficking in human beings, respectively in achieving the strategic goals and specific objectives. Once the reports are consolidated, based on data and findings, they will be shared among stakeholders, which include:

1. Central and local state institutions,
2. Civil society,
3. International partners,
4. Media,
5. General public.

The main responsible for the distribution of results shall fall upon: (i) the National Anti-Trafficking Coordinator, Anti-Trafficking Secretariat. In addition, the publication of the results as part of the NATC’s policy on transparency shall be done through the mass-media as well through informative sessions and roundtables in order to draw fair and objective conclusions regarding the implementation of the Strategy by involving, in particular the civil society.

**IV.6 A Monitoring Model**

The progress made in the implementation of NAP shall be regularly monitored by the responsible authority set forth in this strategy, i.e. the office of the National Coordinator, Secretariat. In this context, all data related to the implementation of activities envisaged in the 2001-2014 NAP should be gathered and analyzed. The proposed monitoring model below should be adapted to the needs of relevant institutional structures.
